## Professional Summary

Final-year Computer Science undergraduate with experience building scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST APIs, authentication systems, AI integration, and cloud deployment. Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Software Engineering.

## Skills

**Languages:** JavaScript, Java, Python, SQL

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

**Backend:** Node.js, Express.js, REST APIs, CRUD Operations

**Databases:** MongoDB, MySQL

**Authentication:** JWT, bcryptjs

**Cloud & Deployment:** Vercel, Render

**Developer Tools:** Git, GitHub, Postman, VS Code

**Core CS:** Data Structures & Algorithms (DSA), OOPS, DBMS, Operating Systems, Computer Networks

## Professional Experience

### HeidelbergCement India Limited

Software Developer Intern

Narsinghar, Damoh, MP

May 2026 – June 2026

- Developed and deployed internal full-stack web applications to digitize manual operational workflows and improve process efficiency.
- Collaborated with cross-functional stakeholders to gather business requirements and translate them into scalable software solutions.
- Built RESTful APIs and designed MongoDB database schemas to support secure, reliable, and efficient data management.
- Automated manual record-keeping processes by developing custom software solutions, reducing repetitive tasks and improving data accuracy.
- Created technical documentation, deployment guides, and user manuals to support application deployment, maintenance, and user onboarding.

## Projects

### Bundeli Krishi Mitra (AI-Powered Agri-Tech Platform)

[Live] — [GitHub]

Tech Stack: React.js • Node.js • Express.js • MongoDB • Tailwind CSS • Google Gemini

July 2026

- Developed a production-ready full-stack agricultural advisory platform using the MERN stack to provide AI-powered crop guidance, localized weather updates, and live Mandi prices for farmers.
- Integrated Google Gemini AI with the Web Speech API to build a voice assistant capable of understanding and responding in the Bundeli dialect.
- Built secure RESTful APIs using Node.js, Express.js, MongoDB, JWT authentication, and bcryptjs for user authentication and authorization.
- Integrated government APIs to deliver real-time Mandi prices and weather information for multiple locations.
- Designed a responsive React.js and Tailwind CSS interface featuring AI chat, crop advisory, fertilizer recommendations, and voice interaction.

### IT Asset Lifecycle Management System

[Live] — [GitHub]

Tech Stack: React.js • Node.js • Express.js • MongoDB

June 2026

- Developed a full-stack IT Asset Management System to manage asset allocation, inventory, maintenance records, and employee assignments.
- Implemented secure authentication and role-based access control using JWT, bcryptjs, and Express middleware.
- Built RESTful APIs for managing assets, users, and maintenance requests with MongoDB as the backend database.
- Designed interactive dashboards with search, filtering, and real-time asset status tracking to improve operational efficiency.
- Deployed the application on Vercel and developed a scalable backend using Node.js and Express.js with structured API error handling.

## Education

### VIT Bhopal University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.24

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

## Certifications

- Data Structures & Performance — (University of California San Diego)
- Google IT Support Professional Certificate — (Google)
- The Bits and Bytes of Computer Networking — (Google)
