Professional Summary

Final-year Computer Science undergraduate with hands-on experience developing full-stack web applications and user-centric software solutions using React.js, Node.js, Express.js, MongoDB, JavaScript, and Python. Passionate about building intuitive user interfaces, learning React Native, and developing scalable applications. Quick learner with industry internship experience delivering real-world software solutions and collaborating with cross-functional teams.

Skills

Programming: JavaScript, Python, Java, SQL

Frontend: React.js, React Native (Learning), HTML5, CSS3, Responsive UI Design

Backend: Node.js, Express.js, REST APIs, API Integration

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, Postman

AI Tools: ChatGPT, GitHub Copilot, Cursor AI

Professional Skills: Problem Solving, Team Collaboration, Fast Learning, Communication, Adaptability

Professional Experience

HeidelbergCement India Limited

May 2026 – June 2026

Operations & Digital Systems Intern

- Developed internal web applications to digitize operational workflows and reduce manual processes.
- Built responsive React-based interfaces and translated business requirements into production-ready software features.
- Worked across development, testing, deployment, and user support to ensure successful implementation.
- Improved application usability by incorporating stakeholder feedback and refining workflows.
- Prepared technical documentation and deployment guides for end users.

Projects

Image Clustering Pro

[GitHub]

Technologies: Python, FastAPI, React.js, JavaScript, Computer Vision, OpenCV

Timeline: March 2025

- Developed a full-stack image management application using React.js for the dynamic user interface, FastAPI, and OpenCV.
- Implemented duplicate detection, blur detection, and similarity-based clustering algorithms for automated image organization.
- Built an intuitive React interface featuring modular components for seamless reviewing, filtering, and exporting processed images.
- Managed client-side UI states and handled asynchronous backend processing requests using Axios to ensure responsive render cycles.
- Optimized application performance for handling large image collections efficiently while maintaining smooth CSS layouts.

IT Asset Lifecycle Management System

[GitHub]

Technologies: JavaScript, React.js, Node.js, Express.js, MongoDB, Git

Timeline: June 2026

- Developed a full-stack IT Asset Management System utilizing React.js for client rendering alongside a Node.js/Express.js backend ecosystem.
- Designed responsive dashboards for asset tracking, maintenance management, and inventory monitoring with an intuitive user interface.
- Built secure REST APIs, integrated reusable frontend components with backend services, and structured robust error-handling states.
- Managed project versioning and source code coordination through Git and GitHub to maintain structural code integrity.
- Improved application usability through continuous functionality testing, UI layout debugging, and stakeholder feedback iterations.

Education

VIT Bhopal University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.24

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies.

Certifications

- Data Structures & Performance — (University of California San Diego)
- Google IT Support Professional Certificate** — (Google)
- The Bits and Bytes of Computer Networking — (Google)

Leadership & Strengths

- Passionate about building intuitive, performant, and user-friendly web and mobile applications.
- Strong foundation in React.js, JavaScript execution contexts, REST APIs, and modern frontend web development paradigms.
- Quick learner with a strong interest in React Native, component optimization, and cross-platform mobile app architectures.
- Regularly use ChatGPT, GitHub Copilot, and Cursor AI to accelerate feature engineering, code prototyping, and debugging processes.
